Contents

[Letter concerning groundwater flow model](#)

[Distribution list](#)

[Groundwater model for the Kennecott Flambeau project at Ladysmith, Wisconsin: A description and summary of results](#)

[Table of Contents](#), pp. i-ii

[Appendix list](#), p. iii

[List of figures](#), p. iv

[List of exhibits](#), p. v

[Executive summary](#), pp. vi-vii

[I. Introduction](#), pp. 1-4

[II. Model capabilities and theory](#), pp. 5-14

[III. Basic data set for model](#), pp. 15-17

[IV. Model calibration procedures and model results](#), pp. 18-26

[V. Simulation of the mining plan](#), pp. 27-42

[VI. An analysis of premining orebody and reclaimed area groundwater flow rates](#), pp. 43-48

[VII. References](#), p. 49

Groundwater Model for the Kennecott Flambeau Project: Appendices A-L

Contents

[Groundwater model for the Kennecott Flambeau project at Ladysmith, Wisconsin: Appendices A-L](#)

[Appendix list](#)

[Appendix A. Model listing, BALPOND.BAS](#)

[Appendix B. Calibration results and input data](#)

[Appendix C. Headstat program](#)

[Appendix D. Gridtodat program](#)

[Appendix E. Grid program](#)

[Appendix F. Fragment of code from PONDARY3.BAS](#)

[Appendix G. Printouts from best engineering judgement \(BEJ\) final steady-state condition model calibration run](#)

[Appendix H. Steady-state BEJ calibrated condition model node flows](#)

[Appendix I. Printout for steady-state high permeability/recharge conditions](#)

[Appendix J. Printouts for steady-state condition low permeability/recharge](#)

[Appendix K. Starting PLASM input data file for mining/reclamation plan](#)

[Appendix L. Printouts for mine simulation and one year of reclamation using the calibrated BEJ value data](#)

Groundwater Model for the Kennecott Flambeau Project: Appendices M-R Salt Lake City: Kennecott Minerals Company, 1989
